Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Request for Continued Examination

1. A request for continued examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's amendment filed on February 14, 2003 has been received and entered in the case.

Election/Restrictions

2. Claim 19 continues to be withdrawn from consideration for the reasons provided in the Office action mailed on November 18, 2002.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Toyoda in view of Coico et al.

Regarding claim 1, Toyoda discloses in Fig. 11, Fig. 12 and page 2/6, section 0014 a semiconductor device, comprising:

- a substrate (11) having a circuit forming surface (upper surface of 11), and having a plurality of electrode pads (19) provided on the circuit forming surface, said electrode pads being disposed to surround an area (17) of the circuit forming surface;
- a semiconductor element (29) mounted within the area of the circuit forming surface;
- a plurality of adhesive lines (27) adapted for use as reference lines, said adhesive lines being disposed under the semiconductor element and on the circuit forming surface, and being respectively provided at positions corresponding to at least three corners of the semiconductor element, said adhesive lines being adapted for use as a reference for determining a correct placement of the semiconductor element within the area of the circuit forming surface, said adhesive lines adhering said semiconductor element to the circuit forming surface of said semiconductor substrate; and
- a sealing resin (33) that seals said semiconductor element.

Toyoda does not disclose the substrate to be semiconductor substrate. However, Coico et al. discloses in Fig. 2 and column 3, lines 5 and 6 a substrate (15) to be semiconductor substrate. Thus, it would have been obvious to one of ordinary skill in the art at the time when the invention was made to modify Toyoda by using the semiconductor substrate as taught by Coico

et al. The ordinary artisan would have been motivated to modify Toyoda in the manner described above for at least the purpose of reducing a thermal difference between the chip and the substrate.

Response to Arguments

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
